Yefri Gonzalez

Backend Developer

Web developer with more than 5 years of experience. Developing Back-end and Front-end for several projects, specializing more in Back-end. I am also passionate about embedded systems development where I have been formed. I have developed several personal projects, as well as for my university career in the field of embedded systems.

Experience

Web Developer (Internship between February and June)

Web Whales, The Hague, Netherland | 2021-02 / Present

- Developed web platform using Laravel framework.
- Reviewed code, debugged problems and corrected issues.
- Worked in Agile Scrum team environment.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements.
- Developed unit test cases for testing and automation.
- Built APIs and data clients to consume APIs.
- Integrated front-end elements into applications.

Web Developer

Recovery Solutions & Investigations, Noord, Aruba | 2018-09 / 2021-02

- Designed, developed and implemented software applications for website based on analyzed requirements.
- Pulled from PHP, MySQL, JavaScript and other knowledge to bolster programming resources.
- Managed user authentication and authorization for servers and various environments.
- Suggested changes and enhancements for websites by offering specific solutions and improvements based on end-user needs.
- Developed web applications and components using PHP and JavaScript programming languages.
- Optimized and repaired site issues and queries.
- Planned and engineered RESTful web services to manipulate dynamic datasets.

All Around

Recovery Solutions & Investigations, Noord, Aruba | 2014-09 / 2018-09

- Established, repaired and optimized networks by installing wiring, cabling and devices.
- Installed, configured, and supported local area network (LAN), wide area network (WAN) and Internet system.
- Set up hardware and software in optimal configurations to meet network performance requirements.
- Managed system-wide operating system and software deployments, as well as related software upgrade problems.
- Investigated and corrected problems with printers, copiers and other peripheral devices.
- Configured hardware, devices and software to set up workstations for employees.
- Removed malware and other threats from laptops and desktop systems.
